1.42bn

TOTAL REVENUE

39,876

HOSPITALS

40,341

TOTAL DOCTORS

40,235

TOTAL PATIENTS

The network operates on a massive scale, maintaining an almost **1:1 ratio** between doctors (40,341) and patients (40,235) currently in the system, and a total of nearly 40,000 hospital facilities. This suggests a highly distributed network rather than a few centralized hubs.

II. Revenue Performance Analysis

Monthly Revenue Trends

Revenue shows a steady, gradual decline throughout the year:

- **Peak:** July (\$122.76M) and August (\$122.66M).

Top Performing Entities

Hospital Group	Revenue

LLC Smith	\$1.03M
Smith PLC	\$1.03M
Ltd Smith	\$1.00M

Strategic Insight: Revenue is highly fragmented. Despite 1.42bn in total revenue, the top hospital (Johnson PLC) contributes only \$1.08M, indicating a long-tail distribution where revenue is spread across thousands of small contributors.

III. Clinical Diagnostics & Patient Health

Medical Condition Distribution

Patient conditions are remarkably evenly distributed (approx. 16% each):

- **Diabetes:** 16.93% (Highest)
- **Hypertension:** 16.78%
- **Asthma:** 16.61%
- **Cancer:** 16.58%
